

Dear committee,

Thank you for the invitation to judge at your Easter show, it's an honor !

Surrounded by horses and dogs, my passion for animals goes back to my earliest childhood, long before I decided to breed Labradors.

It was my partner Pat who introduced me to this crazy Labrador Retriever adventure !

Today, it's more than a passion, it's my life !

With this comes the big plunge into competitions, hunts, field trials and the training courses for my companions and myself.

We're a small kennel «Whispering Labs» and we produce healthy dogs with great character and respect for the breed standard. Labradors are working dogs and I never miss our hunting opportunities, often accompanied by our friends Golden Retrievers and Spaniels.

I also love to show my dogs at exhibitions, so I can be on your side for some great days out.

To improve my skills, I have studied genetics and reproduction of dogs in general. It's something I'm passionate about, to the extent that I now give courses in genetics.

For me, judging is the fulfilment of everything. My core values include the pleasure of seeing Labradors and follow their evolution while maintaining the standard, passing on my knowledge and sharing my advice. Exhibitions enable us to share knowledge, experience and our insights....

I look forward to have the opportunity to judge at your show.

Gwendoline Sermon
